MULTI APPLICATION LUBRICANT FOR AGRICULTURE

Dyade Lubricants introduces its high-performance ACEA E11 / API CK-4 blend, meticulously crafted for machinery in construction, agriculture, and public works. This formulation promises exceptional fuel efficiency and is adept for a variety of uses, including engines, hydraulic systems, and both manual and powershift transmissions. For engines, our lubricant is ideal for heavy-duty diesel engines, compatible with those equipped with or without particulate filters, and aligns with the most recent emission control standards from Stage IIIB to Tier 4 Final, as well as earlier models (Stage I to IIIA, Tier 1 to 3). It's perfect for gearboxes, be they powershift or manual, power take-offs, and the hydraulic systems of farming tractors and off-road machinery. With Dyade, users can expect superior wear resistance, oxidation stability, and unmatched fluidity during cold starts.
