BRAKE FLUID DOT-5.1

This brake fluid is a DOT-5.1 brake fluid developed for use in disc brake systems and hydraulic drum brake systems. Suitable for ABS as well as in ASR brake systems. This brake fluid has a very low viscosity that allows it to perform optimally in the target systems. The reduction of vapour lock risk is ensured by a relatively high boiling point. This fluid is miscible with other fluids meeting the FMVSS 116 DOT-3, DOT-4 and DOT-5.1 specifications.
