

CHAIN-PLUS AWR 460

CHAIN OILS

321800701

ADHERENT, WATER REPELLENT CHAIN OIL

This product exhibits excellent adhesion and high-pressure resistance, making it especially well-suited for use as a water-resistant agent and lubricant on drive chains and overhead conveyor chains. Unlike traditional lubricants, the fluids do not splash or drip, resulting in superior lubrication. This product can be used in service temperatures ranging from -20°C up to 150°C. Its exceptional anti-corrosion capabilities make it ideal for use in marine and other corrosive environments. It is a versatile oil that can be used on various equipment such as hoist chains, forklift trucks, chain saws, general machinery, delicate moving parts of robots, and wherever a high-quality light-grade oil is needed. For best results, apply the product to surfaces that are dry and clean.

CATEGORY

- Chain Lubricants

BENEFITS

- Non-drip properties will extend the lubrication intervals and ensure a clean working area
- Excellent penetration properties provide protection of the moving chain pins and bushes
- Excellent corrosion resistance and dewatering properties allow application to wet or recently washed chains
- The EP additive provides a high degree of wear protection and extends chain life

PROPERTY	METHOD	VALUE
Appearance		Clear fluid, oily liquid
Viscosity @ 40 °C, mm ² /s		460
Viscosity index		>95
Flash point C.O.C, °C		>220
Pour point, °C		<-5
Copper corrosion 3h @ 100 °C		1a
