LUBRICANTS

SYNTHETIC MEDIUM AND HIGH TEMPERATURE CHAIN LUBRICANT

This synthetic fluid is specifically formulated to lubricate chain systems, bolts, roller chains, sliding tracks, and plain tracks operating at medium to high temperatures. Its chemical and thermal stability reduce the amount of evaporation residue. With exceptional anti-wear and lubricating properties, it can withstand high temperatures for prolonged periods. Additionally, it has enhanced penetrating properties. Be sure to stir or shake well before use.

CATEGORY

- Chain Lubricants

BENEFITS

- Enhanced penetrating properties
- Chemically and thermally stable
- Burns clean leaving minimum residues
- Excellent wear inhibitors and good lubricants
- Neutral behavior towards negative influence of by-products in for example textile industry
- No staining
- Keeps slides and chains clean
- Long relubrication intervals
- Very good cold starting properties

PROPERTY	METHOD	VALUE
Density @ 15 °C, kg/dm ³		0.971
Viscosity @ 40 °C, mm ² /s		220
Viscosity index		100
Flash point C.O.C, °C		>240
Pour point, °C		<-25
Copper corrosion 3h @ 100 °C		1a
Acidity index, mgKOH/gr		<1
