**DYADE**  
LUBRICANTS

## SYNTHETIC MEDIUM AND HIGH TEMPERATURE CHAIN LUBRICANT

Before use, stir or shake this synthetic fluid, which has been developed specifically for lubricating chain systems, bolts, roller chains, sliding tracks, and plain tracks that operate at medium to high temperatures. The fluid is chemically and thermally stable, reducing evaporation residue, and can withstand high temperatures for extended periods of time. It is also an excellent anti-wear agent with enhanced penetrating properties.

## CATEGORY

- Chain Lubricants

## BENEFITS

- Enhanced penetrating properties
- Chemically and thermally stable
- Burns clean leaving minimum residues
- Excellent wear inhibitors and good lubricants
- Neutral behavior towards negative influence of by-products in for example textile industry
- No staining
- Keeps slides and chains clean
- Long relubrication intervals
- Very good cold starting properties

PROPERTY	METHOD	VALUE
Density @ 15 °C, kg/dm <sup>3</sup>		0.960
Viscosity @ 40 °C, mm <sup>2</sup> /s		55
Viscosity index		100
Flash point C.O.C, °C		>270
Pour point, °C		<-45
Copper corrosion 3h @ 100 °C		1a
Acidity index, mgKOH/gr		<1
