POWERFUL FOODGRADE CLEANER

This food-grade cleaner degreaser is specially designed to remove grease and oil residue. It is made from a non-toxic citrus oil derivative that is biodegradable, non-caustic, and requires minimal protective equipment when used. This is because it is a completely natural cleaning solution.

Industrial solvents, such as those used to dissolve oil, grease, sludge, and polymer compounds, are typically caustic or acidic and can be hazardous to both employees and equipment if not handled properly. However, with This spray, even the toughest cleaning and degreasing jobs can be done safely without any harsh ingredients. This non-toxic and biodegradable solution is safe to use on delicate surfaces such as painted surfaces and aluminum parts, leaving no streaks or stains. It can be easily rinsed away without causing water pollution, making it a convenient and cost-effective alternative to toxic cleaning solvents that require special handling, storage, and disposal.
