FOODGRADE ELECTRICAL CONTACT CLEANER

This spray is a potent degreaser designed specifically for electrical contacts. It is particularly effective and safe for cleaning electronic components, evaporating quickly without leaving any residue. This product is also compatible with most plastics and elastomers.

This spray is a fast-acting and potent cleaner, perfect for sanitizing electronic equipment and components located in and around food processing areas. Its versatile formula can be used to clean control panels, electric motors, electrical contacts, and switches. This powerful cleaning agent is suitable for use in a variety of industries, including food and pharmaceuticals, thanks to its strong cleaning properties.
