

EMISSION REDUCER

PETROL ENGINE EMISSION REDUCER

322600201

PETROL ENGINE EMISSION REDUCER

This product is particularly formulated in order to reduce the exhaust emissions of the vehicle and gets rid of the smell that comes from the catalytic converter. It reduces noxious exhaust gases such as CO and HC and this product does not harm the catalytic converters. In addition to emission reduction, this product also decreases petrol consumption. Repeat treatment every 4,000 km (2,500 miles). The product can be used in petrol carburetor and injection engines, with or without turbocharger.

HOW TO USE?

Dyade Emission Reducer can be used in petrol carburetor and injection engines, with or without turbo-charger. One bottle of 300ml Dyade Emission reducer treats around 70 liters of petrol. This products shows the best performance before re-filling the petrol, this product is poured into the fuel tank. In order to get the best result it is advised to use the Dyade Emission Reducer every 4,000 km.
