

# DPF CLEAN UP

EXTREME DIESEL PARTICLE FILTER CLEANER

322700201

**DYADE**  
LUBRICANTS

## DIESEL PARTICLE FILTER CLEANER

This DPF cleaner is a concentrated additive that has been developed for diesel engines that reduces soot emissions. This product cleans and regenerates the particulate filter of the vehicle. The advantage of this product is that it reduces soot formation and clears and regenerates blocked soot filters without having to dismantle. This product is particularly developed for diesel engines that are used in city traffic that use a lot of start-stop driving. Because short distance driving does not enable the complete burn-off of soot particles, adding this product will provide the cleaning. It will get rid of the soot particles and will ensure that the combustion will be optimized and lowers the fuel consumption of the diesel vehicle.

## Product information

“People buy this product because they need a concentrated additive to clean the DPF”

### CATEGORY

- Car additive DPF Clean Up

### MAIN BENEFITS

- Reduces soot formation
- Very effective during city-traffic usage
- Lowers fuel consumption

### AVAILABLE PACKAGING

- 300 ML

## HOW TO USE?

The Dyade DPF Clean Up is suitable for diesel engines with all types of diesel particulate filter. It can also effectively be used at diesel and biodiesel up to B30. Please note that this product should only be added to the fuel tank. Next to that add one bottle of 300 ml to minimum 40 liters of diesel. Add every 3rd tank filling or 3,000 km. When this product is used in short-distance driving,

## PRODUCT SPECIFICATIONS DPF CLEAN UP

TEST	UNIT	VALUE
Appearance		Clear Yellow Liquid
Density @ 15 °C	kg/l	0.822
Flash point	°C	71
Refractive index @ 20 °C		1.451
