

HYDRAULIC VALVE TREAT

HIGH CONCENTRATED VALVE LIFTER TREATMENT

322800501

HIGHLY CONCENTRATED - EXTREME PERFORMANCE

This is a highly concentrated additive that is developed to restore efficient working of hydraulic valve lifters. It is suitable for Petrol as well as Diesel engines with or without turbocharger. It is also compatible with all mineral, synthetic, single- and multi-grade oils and suitable for regular and low SAPS applications. This product has special EP (extreme pressure) additives that ensure optimal protection. It easily releases sticking valve stems and hydraulic lifter parts. It completely dissolves dirt and other deposits that have been build up in the oil system.

HOW TO USE?

The Dyade Hydraulic Valve Treat is added to the engine oil. It is advised to use 1 bottle of 300 ml for 3-6 liter of engine oil. It is advised to pour the hydraulic valve treat in the oil after the oil change. The product can stay in the system until the next oil change.

PRODUCT SPECIFICATIONS HYDRAULIC VALVE TREAT

TEST	UNIT	VALUE
Appearance		Brown liquid
Density @ 15 °C	kg/l	0.906
Kinematic viscosity @ 40 °C	mm ² /s	approx. 19.0
Refractive index @ 20 °C		1.490

Product information

“People buy this product because they need to restore the work of hydraulic valve lifters”

CATEGORY

Car additive Hydraulic Valve Treat

MAIN BENEFITS

- Suitable for petrol and diesel engines
- Low SAPS compatible
- Lowers fuel consumption

AVAILABLE PACKAGING

300 ML
