

ATF CLEAN

RESTORE PERFORMANCE OF AUTOMATIC TRANSMISSIONS

322900101

RESTORE AUTOMATIC TRANSMISSION PERFORMANCE

This product is specifically developed for automatic transmissions and to restore their performance. The main purpose is cleaning the internal transmission components. This product also smoothenes and quietsens the gear changes and increases the life of the automatic transmission. When shifting problems are experienced, this product will safely remove the varnish deposits that are present on the transmission components. By restoring the optimal gear shifting, this product prolongs the component lifetime.

HOW TO USE?

This product can be used in all types of vehicles that have an automatic transmission. Add this lubricant to the old ATF fluid before the oil drain. 1 Bottle of ATF Clean of 300ml will be sufficient for 8 liters of oil.

PRODUCT SPECIFICATIONS ATF CLEAN

TEST	UNIT	VALUE
Appearance		Yellow/Brown
Density @ 15 °C	kg/l	0.897
Kinematic viscosity @ 40 °C	mm ² /s	28.0
Kinematic viscosity @ 100 °C	mm ² /s	5.9
Viscosity Index		157
Flash point	°C	205

Product information

“People buy this product because they need to eliminate shifting problems in the Automatic Transmission”

CATEGORY

Car additive ATF Clean

MAIN BENEFITS

- Extreme engine cleaner
- Cleans engines, hydraulic systems, gear-boxes and differentials
- Eliminates sludge, deposits and neutralizes acids

AVAILABLE PACKAGING

300 ML
