

RADIATOR STOP LEAK

CLEANSSES ALL AUTOMOTIVE COOLING SYSTEMS

323000101

DYADE
LUBRICANTS

ACID FREE RADIATOR CLEANER

This product is specifically developed to prevent and stop small leaks in the radiator, cooling and heating system. It also stops head gasket leaks. With its anti-corrosive properties, it protects against rust and corrosion. Therefore, it will not harm rubbers hoses, gaskets or other system components. This product is compatible with all anti-freeze and coolants, also coolants with organic acid technology (OAT). This stop leak prevents clogging of radiator waterways and temperature sensors.

HOW TO USE?

The Dyade Radiator Clean can be used in all 'water' cooled petrol and diesel engines when the cooling liquid needs to be changed. Please follow manufacturer's instructions and recommendations. To increase performance, first replace the old coolant with water, and then add apply Dyade Radiator Clean. Shake the bottle well and add Radiator Clean to the cooling system via the expansion tank when part of the system circuit (two hoses: out and return), or directly into the radiator when a single hose overflow tank is fitted. Warm up the engine with the heater control in HOT position. Let the engine run idle for 10 minutes with the heater still in HOT position. Stop the engine and allow to cool! Open the drain valve and empty the system. With the system still open, flush with water until it is clear, close the system and refill with the coolant. 1 Bottle of Radiator Clean of 300ml will be sufficient for cooling systems of 5 to 12 litres. Dyade Radiator Clean can be used in combination with Dyade Radiator Stop Leak to prevent leakage.

PRODUCT SPECIFICATIONS RADIATOR STOP LEAK

TEST	UNIT	VALUE
Appearance		White suspension
Density @ 15 °C	kg/l	ca 1.001
Freezing point		ca 0 (zero)
pH Undiluted		ca 7.8

Product information

"People buy this product because they want to stop leaks in the radiator"

CATEGORY

- Car additive Radiator Stop Leak

MAIN BENEFITS

- Prevents and stops small leakages in radiator, cooling and heating systems
- Stops head gasket leaks
- Compatible with all anti-freezes and coolants, also OAT
- Avoids clogging of radiator waterways and temperature sensors
- Enhanced protection against rust and corrosion

AVAILABLE PACKAGING

- 300 ML
