HIGH TEMPERATURE FOOD GRADE CHAIN OIL

This product is based on highly polar biodegradable ester base oil and is inhibited against oxidation to give a long-wet film life at high temperatures. The highly polar molecules strongly adhere to the surface and withstand high temperatures, at the same time separating the moving parts due to its highly viscous lubricating film maintained at these high temperatures.

This product is designed for the lubrication of conveyor chains and bearings running continuously at high temperatures, up to 285 °C, and short periods up to 300 °C, on textile stenters, drying machines, bakery ovens and on paint oven chains. It possesses outstanding anti wear capacity and will reduce wear on chains significantly like no other.

CATEGORY

- Chain Lubricants

BENEFITS

- Long fluid life at high temperatures, which provides maximum lubricant economy
- Does not form hard carbon deposits
- Good load and anti-wear properties
- Miscible with most ester-based fluids
- Highly polarized molecules providing excellent lubricity
- Excellent thermal stability
- Peak temperature of 300 °C
