DYADE
LUBRICANTS

FOOD GRADE EMULSIFYING SEAMER FLUID

This product is specifically designed to address challenges in the canning industry. It is a high-performance solution that lubricates main turrets, bearings, chains, and gears while providing viscosity control in the presence of water, excellent load-carrying properties, and corrosion inhibition to protect seamer components. Additionally, it acts as an emulsifier to eliminate free water and prevent corrosion in the presence of water, juices, and sugar. This product is formulated with a high-quality paraffinic petroleum lubricating oil containing ashless dispersant, rust and oxidation inhibitors, anti-wear protection, non-foaming agents, extreme pressure protection, and emulsifiers. This product is specifically designed for applications in can seamers where a total loss emulsifying lubricant is needed.

CATEGORY

- Industry Specific

BENEFITS

- It absorbs free water and juices and transports this to the recirculation tank for easy removal.
- It reduces contact staining which can lead to heavy pitting, rust & corrosion
- This product is NSF H-1, Kosher and Halal registered for incidental food contact
- Stable emulsion
- Excellent lubricating properties
- Highly resistant to oxidation

PROPERTY	METHOD	VALUE
Density @ 20 °C, kg/dm ³		0.87
Viscosity @ 40 °C, mm ² /s		150
Viscosity index		118
Flash point, °C		>200
Pour point, °C		<-15
Rust Test		Pass
FZG load stage		12
Kosher approved		Yes
Halal approved		Yes
NSF registration		157690
