## DEWATERING RUST PREVENTION FLUID

The contents of this product include solvents, rust inhibitors, and hydrophobic additives, resulting in a fluid that effectively expels moisture and water from parts. This leaves behind a greasy and oily coating that boasts impressive anti-rust properties. Typically, this product is administered to safeguard parts that have undergone machining with soluble oils. It can also be utilized to protect parts that have been quenched with water before packaging or machine components that are exposed to corrosive moisture.

## CATEGORY

■ Rust Preventatives

## BENEFITS

PROPERTY	METHOD	VALUE
Nature		Liquid with solvents
Application		At room temperature
Density @ 20 °C, kg/dm <sup>3</sup>		0.86
Drying time, minutes		30
Chemical reaction		None
Flash point C.O.C, °C		65
Indoor protection, months		18
Removal/cleaning detergents		By solvents or alkaline
