DEWATERING RUST PREVENTION FLUID

This fluid product, which contains solvents, corrosion inhibitors, and hydrophobic agents, has the ability to repel and displace water. Upon application, it will create a thin film that provides excellent anti-rust protection. You can use this product on any parts that have been treated with metalworking emulsions, including machined parts that are wet with grinding or soluble oils, parts that have been quenched in water, parts or machinery that have come into contact with fluids accidentally, chemically worked parts, and as a final protective coating for sheet steel and tubes.

CATEGORY

- Rust Preventatives

BENEFITS

- Excellent anti rust protection
- Prevents corrosion risks
- Preliminary drying of parts is not necessary

PROPERTY	METHOD	VALUE
Base oil type		Liquid with solvents
Density @ 20 °C, kg/dm ³		0.79
Flash point C.O.C, °C		45
Type of film		Oily
Drying time, minutes		30
Chemical reaction		None
Indoor protection, months		6-9
