OIL BASED RUST PREVENTATIVE

Designed for providing high-quality protection, this product is an oil-based rust preventive that creates a thin, oily film to safeguard both ferrous and non-ferrous metals for an extended period. It is particularly useful for indoor storage lasting up to five to six months. Some common uses include: Shielding completed machine parts before they are packaged Safeguarding machined or ground metal surfaces, such as valves, rollers, and fasteners, between operations Preserving components during storage when a thin protective layer is necessary

CATEGORY

■ Rust Preventatives

BENEFITS

PROPERTY	METHOD	VALUE
Appearance		Light brown
Density @ 20 °C, kg/dm ³		0.84
Viscosity @ 40 °C, mm ² /s		4
Type of film		Oily
Flash point C.O.C, °C		100 +/- 5 C
Indoor protection, months		5-6
