RUST PREVENTATIVES

325202301

## DEWATERING RUST PREVENTION FLUID. COLD APPLICATION.

The composition of this product includes solvents, corrosion inhibitors, and hydrophobic additives that work to repel and displace water or humidity from parts. As a result, a light film with excellent anti-rust properties is left behind on the surface of the parts. This product is suitable for use on all parts that have previously been treated with metalworking emulsions. It provides provisional protection during the storage of parts in the following stages: Machined parts that are still wet from grinding or soluble oils; Parts that have been quenched in water; Parts or machinery that have accidentally come into contact with fluids; Parts that have been rinsed with water after undergoing blueing or chemical blacking. It can also serve as a final protective layer for sheet steel and tubes.

## CATEGORY

- Rust Preventatives

## BENEFITS

- Provide anti-rust protection of wet parts or humid environment
- Prevents corrosion stains by sweat on grinded or polished parts
- Not necessary to dry parts for protection

PROPERTY	METHOD	VALUE
Appearance		Clear fluid
Nature		Liquid with solvents
Density @ 20 °C		0.84
Coating		Greasy-oily
Drying time		30 min.
Compatibility		All metals
Flash point C.O.C. °C		40
Indoor protection (months)		3-12
Salt spray test (ASTM B117)		50 Hrs
Removal		Solvent or Alkaline detergent
