RUST PREVENTATIVES

325202401

ANTI-CORROSIVE ANTI SHOCK

At room temperature, this product has a solid plastic consistency. However, when it is melted, it creates a thick and flexible film on easily removable parts. This film serves as an anti-corrosive agent and also offers excellent protection against impact and abrasion. This product is ideal for safeguarding a wide range of items including screws, valves, gears, bearings, tools, segments, car parts, machinery, cutlery, and springs.

CATEGORY

- Rust Preventatives

BENEFITS

- Good protection against all kind of rust
- Easy application
- Protects from impacts and abrasion
- Easy to remove
- Safe and economic in use
- Non-toxic and risk-free under normal conditions of use
- Can be re-used

PROPERTY	METHOD	VALUE
Film type		Plastic, elastic, peel off
Colour		Light yellow, transparent
Temperature of use, °C		130-180
Spread power, approx., m ² /kg		1,8-3
Anti-rust power		Limitless
Removal		Peeling off
Film thickness, mm		1-2,4
