WAXY RUST PREVENTATIVE

The product is a rust preventive that is solvent-based and creates a translucent, waxy film that offers long-term protection for both ferrous and non-ferrous metals. It possesses dewatering properties that effectively displace water or humidity from the parts, resulting in a light amber film with exceptional anti-rust properties. This product is intended for applications that require protection for both indoor and outdoor storage, as well as international shipments. Typical applications include vehicle rustproofing, safeguarding packaged items during storage and shipment, long-term indoor protection, and protecting parts during storage where a firm, dry film free from tackiness is necessary.
