RUST PREVENTATIVES

325203101

THIN OILY FILM ANTICORROSIVE AGENT

This product is designed to safeguard profiles, tubes, cold-rolled sheets, rolling strips, steel pieces, cast and sintered pieces, phosphatized pieces, or browned pieces once dry before packing and storing. It creates a rust-preventive oily film that provides excellent resistance to corrosion. This product can offer protection against corrosion for three to six months during indoor storage. Some applications of this product include:- Preserving finished machine components before packaging.- Safeguarding steel sheets, profiles, and rolled strips.- Protecting industrial motors, car engines, and truck engines.- Providing inter-operational protection for finished machined or ground metal surfaces, such as valves, rollers, and fasteners

CATEGORY

- Rust Preventatives

BENEFITS

- High anticorrosive capacity
- Compatibility with lubricating oils
- Easy removal
- High coating capacity
- Free of barium and solvents

PROPERTY	METHOD	VALUE
Appearance		Clear fluid
Viscosity @ 40 °C, mm ² /s		13-16
Flash point C.O.C, °C		175
Density @ 20 °C		0.86
Film thickness, microns		5
