MULTI-USE DEWATERING RUST PREVENTIVE

This is a high-quality rust preventive product that utilizes a combination of solvents and oil to form a thin, long-lasting oily film for the protection of both ferrous and non-ferrous metals. Thanks to its dewatering properties, it offers good coverage of metal parts and is ideal for use in applications where protection is required during indoor storage for periods ranging from 9 to 12 months. Additionally, this product meets most of the specifications outlined in MIL-C-81309. Typical applications for this product include the protection of finished machine components prior to packaging, steel sheets, profiles, and rolled strips, as well as inter-operational protection of finished machined or ground metal surfaces such as valves, rollers, and fasteners. This product has a range of typical applications, such as providing protection for weapons, lubricating weapons, and also serving as a lubricant for certain machine parts.
