LUBRICANTS

BIOSTABLE METALWORKING FLUID FOR STEEL AND CAST IRON

The product is a soluble oil that creates a milky emulsion with exceptional anticorrosive properties. The high oil content in the emulsion offers protection for metalworking machine elements and ways. The product has excellent wetting properties due to its low surface tension, ensuring effective cooling at the tool edge. This product is suitable for a wide range of metalworking operations and materials, including machining steel, iron, cast iron, aluminum, and its alloys.

CATEGORY

- Metalworking Fluids

BENEFITS

- Does not contain sodium nitrite
- Good swarf settling properties
- Economical in use
- Does not smoke or burn
- Good service life
