WATER SOLUBLE METALWORKING FLUIDS (GENERAL-GRINDING)

325300501

GRINDING AND GENERAL MACHINING SOLUBLE COOLANT

This semi-synthetic metalworking fluid can create stable micro-emulsions when mixed with water. Its unique bacteriostatic properties provide excellent biological resistance, eliminating the need to add biocides or fungicides. Unlike other conventional products, its emulsion has a longer lifespan and does not require additional maintenance costs. It is operator-friendly and protects the machine from rust, resulting in an economical fluid management solution. The product is suitable for a wide variety of machining operations and grinding on all grades of steel and cast iron. The product is suitable for centralized systems and independent machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- High anticorrosive properties
- Good cooling
- Excellent service life
- Environmentally acceptable
- Does not contain nitrite or chlorine
- Does not form sticky deposits on machine surface
- Economical in use
