WATER SOLUBLE METALWORKING FLUIDS (BIOSTATIC)

325302001

## BIOSTATIC SOLUBLE COOLANT

This biostatic metalworking fluid is specifically designed for highly demanding machining operations that require water-based solutions. The product is formulated using carefully selected materials that prevent the growth of sump bacteria, which can cause separation of conventional emulsions, unpleasant odors, and corrosion of components and machinery. Formulated to meet the exacting demands of modern production engineering techniques, this product is suitable for a wide variety of machining operations, including turning, milling, boring, tapping, and sawing on ferrous metals, cast iron, steel and its alloys, as well as aluminum.

## CATEGORY

- Metalworking Fluids

## BENEFITS

- Does not form sticky deposits on machine surface
- Good swarf settling properties
- Eliminates bacteria growth
- Operator friendly
- Environmentally acceptable
- Does not contain nitride, chlorine or phenols
- Excellent service life
- Economical in use
