WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325302301

## GENERAL MACHINING SOLUBLE COOLANT

When mixed with water, this product forms a milky transparent emulsion that has biostatic properties. Its carefully balanced levels of additives guarantee superior performance compared to conventional emulsions, especially in terms of finishing, tool and sump life, and rust control, when used in the recommended concentration. Additionally, the product is safe for operators and protects the machine from rust. This product is versatile and can be used for a wide range of machining operations on various types of metals such as steel, aluminum, and yellow metals. It is compatible with both centralized systems and independent machines.

## CATEGORY

- Metalworking Fluids

## BENEFITS

- High anticorrosive properties
- Good cooling
- Excellent service life
- Environmentally acceptable
- Multi metals
- Does not form sticky deposits on machine surface
- Economical in use
