BIOSTATIC GRINDING FLUID

This product is a new synthetic coolant that has been developed using a carefully selected blend of chemicals in a solution that offers an oily grinding fluid without containing any formaldehyde. This clear fluid is appropriate for various grinding operations and less demanding machining tasks on steel, cast iron, and copper. The formulation is based on carefully chosen materials that do not support the growth of bacteria in the sump, which can lead to issues such as foul odors and corrosion of tools and components. Even under turbulent conditions, it remains stable without foaming or splitting, and effectively repels tramp oil. Its superior swarf settling and anti-corrosion properties enable it to provide trouble-free sump life for months with just one application.

CATEGORY

- Metalworking Fluids

BENEFITS

- Excellent swarf setting properties
- Formaldehyde and boron free
- Does not support bacteria
- Economical in use
- Does not smoke or burn
- Multi-metallic inhibitor, i.e. copper, steel, brass
- Rejects tramp oil
- No smell problems
- Exceptionally stable
