WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325302801

BORON-FREE SEMI-SYNTHETIC COOLANT

This semi-synthetic metalworking fluid is free from boron and formaldehyde. Its unique formulation provides excellent resistance to bacterial growth, eliminating the need for biocides or fungicides. The product is designed for long life, reducing maintenance costs. It is safe for operators and protects machines from rust. The product is suitable for use in a wide range of machining operations. This product is appropriate for various machining operations on steel, aluminum, and cast iron, and can be utilized in both centralized systems and independent machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- Does not contain boron, formaldehyde, nitrite or chlorine
- High anticorrosive properties
- Excellent service life
- Good cooling properties
- Does not form sticky deposits on machine surface
- Good detergency properties
- Healthy and environmental acceptable
