WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325303101

MULTI-FUNCTIONAL SEMI-SYNTHETIC SOLUBLE CUTTING FLUID

This formaldehyde-free semi-synthetic soluble cutting fluid is formulated to form stable micro emulsions without containing chlorinated compounds, nitrites, or secondary amines. Its unique formulation results in excellent resistance to biological growth, which eliminates the need for biocides or fungicides. The product is safe for operators and protects machines from rust. It is also highly stable even in water with hardness levels up to 900 ppm. The product can be used for a wide range of machining operations on aluminum, steel, cast iron, copper, and brass and can be used in both centralized systems and independent machines. This product is suitable for a diverse range of machining operations on steel, cast iron, and aluminum of all grades. It is also suitable for grinding operations that require a high-quality finish. Additionally, it can be used in both independent machines and centralized systems.

CATEGORY

- Metalworking Fluids

BENEFITS

- Operator friendly product
- Multi-metallic corrosion inhibition
- Long life service
- Environmentally friendly
- Does not form sticky deposits on machine surface
- Economical in use
- Formaldehyde free
