BIOSTATIC GRINDING FLUID

This transparent fluid is ideal for use in both HFA-S hydraulic systems and grinding operations. Its formulation contains carefully selected components that actively combat odor issues and corrosion of components. The fluid remains stable without foaming or separating even under severe conditions, ensuring a long lifespan. It provides excellent corrosion protection and is suitable for use in severe grinding conditions, as well as for use as an HFA-S classified coolant in hydraulic systems.

CATEGORY

- Metalworking Fluids

BENEFITS

- Does not contain sodium nitrite
- Excellent swarf settling properties
- Fighting bacteria growth
- Economical in use
- Does not smoke or burn
- Multi-metallic inhibitor, i.e. copper, steel and brass
- Rejects tramp oil
- Eliminates smell problems
- Exceptionally stable
