WATER SOLUBLE METALWORKING FLUIDS (BIOSTABLE)

325303701

BIOSTABLE METALWORKING FLUID FOR TITANIUM AND SURGEON STEEL

When mixed with water, this synthetic metalworking fluid forms transparent and stable emulsions. It is effective in achieving excellent finishing during machining operations and grinding on tools, dies, and hard metal parts that contain materials such as tungsten carbide, copper, and cobalt. Due to its special formulation, the product is suitable for use in both centralized systems and independent machines, and it has excellent biological resistance, eliminating the need for additional biocides or fungicides.

CATEGORY

- Metalworking Fluids

BENEFITS

- No impact on operator
- Economical in use
- Does not smoke or burn
- Multi-metallic inhibitor, i.e. copper, cobalt, steel
- Rejects tramp oil
- No smell problems
- Exceptionally stable
