

MWF-PLUS WS GEN 53

WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325303901

EXTREME PRESSURE SOLUBLE COOLANT

This product is a water-soluble extreme pressure metalworking fluid that forms highly stable emulsions when mixed with water. Its unique formulation provides excellent biological resistance, eliminating the need for additional biocides or fungicides. It is a biostatic product that has a long life and does not generate additional maintenance costs. Moreover, it does not produce any harmful impact on operators and also safeguards the machine from rust. This product is appropriate for a diverse range of demanding machining operations on all types of steel, cast iron, stainless steel, and alloy steels. It can be used in both centralized systems and independent machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- High anticorrosive properties
- Good cooling
- Excellent service life
- Environmentally acceptable
- Does not contain nitrite or chlorine
- Does not form sticky deposits on machine surface
- Economical in use
