

MWF-PLUS WS GEN 47

WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325304101

This high-performance coolant contains a maximum concentration of lubricity additives combined with other multifunctional components to provide biostatic characteristics. The product is suitable for both aluminium and ferrous metals operations including grinding when a high surface finish is required. Its superior lubricity characteristics ensure excellent finish and tool life even on arduous machining operations and materials. The product is formulated to meet the high demands of modern production engineering techniques.
