

MWF-PLUS WS GEN 43

WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325304201

This high-performance coolant is formulated with a combination of maximum levels of lubricity additives and other multi-functional components, which provide biostatic characteristics. This high-performance coolant is formulated with maximum levels of lubricity additives and other multi-functional components to provide excellent biostatic characteristics. It can be used for various aluminum and ferrous metal machining operations, as well as grinding when a superior surface finish is desired. Its superior lubricity properties ensure extended tool life and excellent finishing even in tough machining operations and materials. This product is designed to meet the demanding requirements of modern production engineering techniques.
