

MWF-PLUS WS GEN 25

WATER SOLUBLE METALWORKING FLUIDS (GENERAL MACHINING)

325304401

HIGH LUBRICATION PERFORMANCE SOLUBLE METALWORKING FLUID

The product is biostatic, providing long life and avoiding additional maintenance costs as it does not require the addition of fungicides. Additionally, it does not have an impact on operators and protects machines from rust. This product is appropriate for a diverse range of demanding machining operations, including broaching, tapping, threading, and reaming on various steel grades, aluminum, cast iron, stainless steel, and alloy steels. The product can be used in both centralized systems and standalone machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- High anticorrosive properties
- Good cooling and EP properties
- Excellent service life
- Environmentally acceptable
- Does not contain nitrite or chlorine
- Does not form sticky deposits on machine surface
- Economical in use
- Higher tool life
- Good detergency properties.
