

MWF-PLUS WS GEN-GR 27

WATER SOLUBLE METALWORKING FLUIDS (GENERAL-GRINDING)

325305001

GRINDING AND GENERAL MACHINING SOLUBLE LUBRICANT

This biostatic product contains EP properties that extend the fluid's lifespan and decrease maintenance expenses. The fluid's usage is secure for workers and safeguards the machine against rust and other detrimental consequences. This product is versatile for a range of machining operations on steel, titanium, and yellow metals. It is compatible with both centralized systems and independent machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- High anticorrosive properties
- Good cooling
- Excellent service life
- Environmentally acceptable
- Good EP properties
- Does not form sticky deposits on machine surface
- Economical in use
- Multi metal suitability
