WATER SOLUBLE METALWORKING FLUIDS (BIOSTABLE)

325305201

BIOSTABLE METALWORKING FLUID

This high-performance coolant is free of formaldehyde and contains a maximum amount of lubricity additives, as well as other multi-functional components that provide biostatic properties. This product is appropriate for use in all types of operations involving aluminum and steel. It can also be utilized for grinding when a superior surface finish is required. Its superior lubricity properties guarantee exceptional finishing and tool lifespan, even during challenging machining operations and with difficult materials. This product has been specially formulated to meet the rigorous demands of modern production engineering techniques.

CATEGORY

- Metalworking Fluids

BENEFITS

- Operator acceptability
- Ideal rationalization product
- Excellent service life
- Environmentally acceptable
- Does not contain nitrite or chlorine
- Does not form sticky deposits on machine surface
- Multi-metallic corrosion inhibition, i.e., aluminium, steel and brass
- Economical in use
- Formaldehyde free
