WATER SOLUBLE METALWORKING FLUIDS (BIOSTABLE)

325305301

**DYADE**  
LUBRICANTS

## BIOSTABLE METALWORKING FLUID

This high-performance coolant is devoid of formaldehyde and contains the maximum amount of lubricity additives, in addition to other multifunctional components that confer biostatic properties. This product can be used in all kinds of operations involving aluminum and steel. Additionally, it is appropriate for use in grinding operations that require a high surface finish. Its superior lubricity properties guarantee excellent finishing and extended tool life, even when working with challenging materials and demanding machining operations. This product has been specifically formulated to meet the rigorous demands of modern production engineering techniques.

## CATEGORY

- Metalworking Fluids

## BENEFITS

- Operator acceptability
- Ideal rationalization product
- Multi-metallic corrosion inhibition, i.e., Aluminium, Steel and Brass
- Excellent service life
- Environmentally friendly
- Does not form sticky deposits on machine surface
- Economical in use
- Does not contain nitrite, formaldehyde or chlorine
