WATER SOLUBLE METALWORKING FLUIDS (OTHER)

325305401

MULTI-METAL BORON FREE SOLUBLE COOLANT

This soluble metalworking fluid is free of boron and formaldehyde. Its unique formulation provides excellent biological resistance, eliminating the need for biocides or fungicides. This product has a long lifespan and does not generate additional maintenance costs. Moreover, it is safe for operators to handle and protects the machine from rust. It is highly stable in hard water environments up to 800 ppm and chlorides up to 700 ppm. This product is versatile and can be used for a range of machining operations on various metal grades, such as steel, aluminum, cast iron, copper, and brass. It is also compatible with both centralized systems and independent machines.

CATEGORY

- Metalworking Fluids

BENEFITS

- Operator acceptability
- Ideal rationalization product
- Multi-metallic corrosion inhibition, i.e., Aluminium, Steel and Brass
- Excellent service life
- Environmentally friendly
- Does not form sticky deposits on machine surface
- Economical in use
- Does not contain boron, nitrite, formaldehyde or chlorine
- High anticorrosive properties
