HIGH PERFORMANCE FORMING AND MACHINING OIL

Formulated from carefully selected hydrocarbons and chemical stabilizers, this product is a clear and transparent light oil that offers superior lubrication and leaves minimal residue after rapid evaporation. It is free from chlorine. This product is specifically designed for metal forming applications involving iron, steel, stainless steel, and aluminum. It provides a high-quality surface finish, making it ideal for finishing operations. Additionally, it can be used for general machining of copper, bronze, aluminum, and brass materials.

CATEGORY

- Metalworking Fluids

BENEFITS

- Excellent lubricating properties
- High performance
- Improved tool life and surface finish
- Improved productivity
- Chlorine, silicon and halogenated products free
- High evaporation

PROPERTY	METHOD	VALUE
Appearance		Liquid
Density @ 20 °C, kg/dm ³		0.83
Viscosity @ 40 °C, mm ² /s		5
Copper corrosion		1a
Flash point, °C		>115
Pour point, °C		<-35
