LUBRICANTS

## MACHINING NEAT CUTTING OIL

Our product is made from carefully selected paraffinic base oils and fortified with stable additives, resulting in a non-active cutting oil that delivers exceptional performance over a wide range of temperatures and pressures, even under challenging machining conditions. Importantly, it does not contain heavy metals or chlorine. This product is intended for machining applications that demand a high-quality surface finish. It is appropriate for use on both ferrous and non-ferrous metals, including all grades of steel, brass, copper, bronze, and aluminum, for operations such as turning, boring, tapping, milling, and screw cutting.

## CATEGORY

- Metalworking Fluids

## BENEFITS

- Good flushing, cooling and lubricating properties
- Improved tool life and surface finish
- Transparent and non-active oil
- Improved productivity
- Environmentally friendly

PROPERTY	METHOD	VALUE
Colour		Clear Amber-Yellow
Density @ 20 °C, kg/dm <sup>3</sup>		0.88
Viscosity @ 40 °C, mm <sup>2</sup> /s		32
Flash point, °C		190
Pour point, °C		-8
Rust test		None
