LAPPING AND HONING NEAT CUTTING OIL

This low viscosity oil is specifically designed for use in lapping, honing, and grinding operations, and is formulated to be compatible with diamond and cubic boron nitride (CBN) grinding wheels. This product is formulated for finishing applications that demand the highest quality surface. It can be used on steel and cast iron materials.

CATEGORY

- Metalworking Fluids

BENEFITS

- Good flushing, cooling and lubricating properties
- Improved tool life and surface finish
- High performance
- Improved productivity
- Less consumption

PROPERTY	METHOD	VALUE
Colour		yellowish
Density @ 20 °C, kg/dm ³		0.84
Viscosity @ 40 °C, mm ² /s		6 - 8
Flash point, °C		120
Pour point, °C		-8
