LAPPING AND HONING NEAT CUTTING OIL

This product is an oil with low viscosity, specifically formulated for finishing operations while minimizing the generation of oil mist. This product is formulated for use in lapping, honing, and grinding operations, as well as for the sharpening of disks and tools. It is suitable for use on steel, iron, and cast iron surfaces.

CATEGORY

- Metalworking Fluids

BENEFITS

- Good flushing, cooling and lubricating properties
- Improved tool life and surface finish
- High performance
- Less consumption
- Improved productivity

| PROPERTY | METHOD | VALUE |
|---------------------------------------|--------|-----------|
| Colour | | Yellowish |
| Viscosity @ 40 °C, mm ² /s | | 10 |
| Flash point, °C | | >170 |
| Pour point, °C | | <-7 |
| Density @ 20 °C, kg/dm ³ | | 0.86 |
| Type | | Active |
