FULLY SYNTHETIC NEAT CUTTING OIL

This is a synthetic oil with low viscosity, high chemical stability, and low mist formation, which is biodegradable. It is designed specifically for sharpening and grinding applications, and it is appropriate for use with diamond and cubic boron nitride (CBN) grinding wheels. This abrasive tool is specifically engineered to achieve a superior surface quality, making it ideal for applications that demand the highest level of precision. It is highly effective for sharpening and grinding tools and circular saws, even for the most demanding tasks. Furthermore, it is compatible with a wide range of materials such as steel, cast iron, brass, bronze, copper, and aluminum.

CATEGORY

- Metalworking Fluids

BENEFITS

- Good flushing, cooling and lubricating properties
- High productivity
- Improved tool life and surface finish
- High performance
- Biodegradable
- Less consumption

PROPERTY	METHOD	VALUE
Colour		Colourless
Viscosity @ 40 °C, mm ² /s		8-11
Density @ 20 °C, kg/dm ³		0.87
Flash point C.O.C, °C		195
Pour point, °C		-3
