

MWF-PLUS NT DRAW TUBE 12

NEAT/PURE METALWORKING FLUIDS

325404201

TUBE DRAWING OIL

This product is a neat oil that is specifically formulated for use in tube drawing and forming applications for copper, bronze, and aluminium. It has excellent lubricity and does not leave any residue after annealing treatments. This product provides exceptional friction reduction properties and outstanding bright annealing characteristics. By using carefully selected additives and a boundary lubricant, it achieves an excellent tube surface finish and extends the life of dies.

CATEGORY

- Metalworking Fluids

BENEFITS

- Avoids contact between piece and die
- Low Odour
- No residues left
- Good Lubricity
- Low Oil consumption
- Excellent rolling ability
- Good reduction capability
- Excellent surface finish and brightness

PROPERTY	METHOD	VALUE
Appearance		Oily yellowish liquid
Density @ 20 °C, kg/dm ³		0.89
Viscosity @ 40 °C, mm ² /s		31
Flash point, °C		>190
Pour point, °C		<-28
Copper corrosion		1a
