NEAT/PURE METALWORKING FLUIDS

325404701

STAMPING AND FORMING FLUID

The formulation of this product is based on ester and is considered a premium oil for stamping and forming applications. It includes a blend of E.P. additives for superior performance and finishing. The presence of polar compounds helps to achieve more efficient operations and higher productivity. This ester-based premium oil is formulated for drawing, stamping, and cutting metal parts and automotive components, with steel and stainless steel being the main materials to form. However, it is not recommended for use with yellow metals due to its Sulphur content. The product can be easily applied with a brush, cloth, or similar tool.

CATEGORY

- Metalworking Fluids

BENEFITS

- Avoids contact piece and die
- Easy to apply
- Less defect in pieces
- Minimum wear in tools
- High film strength
- Better piece finish

PROPERTY	METHOD	VALUE
Appearance		Brown liquid
Density @ 20 °C, kg/dm ³		0.95
Viscosity @ 40 °C, mm ² /s		150
Flash point C.O.C, °C		202
Pour point, °C		-8
Chlorine		Null
