NEAT/PURE METALWORKING FLUIDS

325405401

COLD ROLLING FLUID

This product is specifically formulated for the cold rolling of aluminum, but it can also be utilized for light stamping operations involving aluminum, copper, brass, and steel. It contains a unique additive package that prevents the formation of residues during the annealing treatment following the rolling process. To prevent crystallization, it is crucial to keep the product stored above 15°C and use it accordingly.
