

MWF-PLUS NT DRAW COP 13

NEAT/PURE METALWORKING FLUIDS

325405501

COPPER WIRE DRAWING WATER MISCIBLE LUBRICANT

This water-miscible fluid is specially formulated for universal drawing of copper rods, intermediate, and fine wires. Its unique blend of synthetic additives provides exceptional surface finishing, while the copper anti-corrosion inhibitors offer excellent protection against corrosion. This solution is the ideal choice for achieving peak performance in copper drawing, as it offers outstanding lubrication that prolongs the lifespan of dies and equipment. Additionally, its emulsions deliver a brilliant surface finish for the wire, while also preventing annealing residues. The product's high detergency properties keep drawing lines clean and free of copper fines deposits.

CATEGORY

- Metalworking Fluids

BENEFITS

- Improved die life
- Improved surface quality
- Low maintenance
- Increased emulsion life
- Biological resistance
- Reduced operating cost

PROPERTY	METHOD	VALUE
Appearance		Oily
Emulsion		Milky Stable
Density @ 20 °C, kg/dm ³		0.92
pH emulsion @ 5%		8,7-9
Stability		Good
