FORMING AND WIRE DRAWING OIL

This is a specially formulated oil for forming and drawing aluminum parts, with a high concentration of EP additives and corrosion inhibitors that prevent surface oxidation. It is also suitable for wire drawing, ensuring a bright wire appearance thanks to the specially selected additives. The product does not contain any chlorine compounds. The product may be applied pure, with a brush, cloth or similar.

CATEGORY

- Metalworking Fluids

BENEFITS

- High wire section reductions
- Less risks of seizures
- Minimum wear coefficient
- High film strength
- Better wire finishing

PROPERTY	METHOD	VALUE
Appearance		Oily liquid
Colour		Amber
Density @ 20 °C, kg/dm ³		0.89
Viscosity @ 40 °C, mm ² /s		100-110
Flash point, °C		230
Pour point, °C		-6
