

MOULD-PLUS BIO GEN 55

MOULD RELEASE FLUIDS

327300201

DYADE
LUBRICANTS

BIODEGRADABLE CONCRETE RELEASE AGENT

This product is an eco-friendly solution for concrete release, featuring a specially selected blend of additives. Its formulation is designed to create a thin film between the mould and concrete part, ensuring a smooth release. This product is safe to use, causing no harm to operators, and helps extend the lifespan of moulds. Furthermore, it is a non-toxic solution that is free from mineral oil, preventing any staining on moulds or rubber parts that are present in certain types of formworks. This product can be used as is and applied with a brush, roller, rag, or spray gun. However, it is important not to expose the product to low temperatures as it may impact its stability and other properties. Additionally, be mindful of low frost temperatures that can cause separation and the creation of water crystals.

CATEGORY

- Industry Specific

BENEFITS

- Operator friendly
- Biodegradable
- Longer mould life
- Good finishing
- High efficiency
- Non toxic
- Ready to use

PROPERTY	METHOD	VALUE
Appearance		Light yellow
Density @ 20 °C, kg/dm ³		0.96
Flash point C.O.C, °C		None
Pour point, °C		10-14
Mould corrosion		No corrosion
